Seven Killed and Ten Seriously Injured in Drone Attack on Fuel Station in Nyala city

The Ministry of Health of the Transitional Peace Government strongly condemns the attack carried out today, Tuesday, 17 November 2026, on a fuel station in Nyala, using a drone operated by the terrorist Muslim Brotherhood militia.

This latest atrocity, part of a continuing series of crimes attributed to this terrorist group, resulted in seven people being burned beyond recognition, while ten others sustained severe and critical burn injuries. Emergency and rescue operations are still ongoing at the scene.

The Ministry reiterates that civilians must be protected at all times and that deliberately targeting civilians constitutes a grave violation of international humanitarian law and may amount to a war crime.

The Ministry calls upon the international community, the United Nations, and the international human rights and humanitarian and health organizations to take urgent action and to ensure that attacks against civilians are not normalized or treated as an inevitable consequence of the ongoing conflict.

The Ministry highly commends the dedication and tireless efforts of all medical and healthcare personnel who are doing everything within their capacity to mitigate the consequences of these atrocities and provide treatment to the injured, despite extremely limited resources.

The Ministry also calls upon medical and humanitarian organizations to urgently assist in providing life-saving support to the injured, particularly those suffering from severe burns, and to ensure the availability of essential medical supplies, medicines, and specialized treatment required to save their lives. All affected individuals must have unhindered access to the medical care they urgently need.

The Ministry reaffirms its unwavering position that the protection of civilians and their right to life and safety are fundamental rights that must never be violated. Civilians are not military targets, and continued attacks against them constitute war crimes and crimes against humanity.

Targeting civilians is a crime. International silence must never become an alternative to justice and accountability.
